CAREER OBJECTIVE

Highly motivated and results-driven MERN stack developer seeking a challenging role to showcase my expertise in building robust and scalable web applications. I am committed to delivering innovative solutions through continuous learning, collaboration, and a strong work ethics.

SKILLS

- **Expertise:** HTML, CSS, Bootstrap, Tailwind CSS, DaisyUI, React Bootstrap, git, npm
- **Comfortable:** JavaScript, React.js, Firebase, Express.js, React Router, REST API, Vite
- **Familiar:** MongoDB, JWT, Node.js
- **Tools:** GitHub, Netlify, Vercel, Firebase Hosting, Cloudflare, Figma, VS Code

PROJECTS

Language School

[Live Link](#) | [Source Code](#) ([Client](#) | [Server](#))

- Integrated Firebase for authenticating the users.
- Different user roles (Admin, Instructor, Student) have different access levels.
- It uses JWT for secure user authorization.
- Uses Stripe payment gateway to receive payment for the enrolled students.
- Uses CRUD operations to add or update new users, classes, transaction IDs etc.

Technologies: ReactJS | MongoDB | Stripe Payment Gateway | Firebase | Express.js | Tailwind CSS

Toy Marketplace

[Live Link](#) | [Source Code](#) ([Client](#) | [Server](#))

- Integrated Firebase for authenticating the users.
- CRUD Operations to add, delete or update toys added by the user.
- It uses Firebase for user authentications.
- It uses private routes for specific pages, and the user must log in to see the page.
- The client-side is hosted on Netlify, and the server is on Vercel.

Technologies: ReactJS | MongoDB | Firebase | Express.js | Tailwind CSS | Node.js | Netlify

Chef Recipe Hunter

[Live Link](#) | [Source Code](#) ([Client](#) | [Server](#))

- It uses private routes for the chef details page, so the user must be logged in to view it.
- It uses Firebase to both authenticate the users as well as host the client side.
- The user can log in using either email and password or using a Google or GitHub account.
- It uses Vercel to host the server side of the website.
- This uses a slider to show different menu items on the homepage.
- This is a single-page application, so other pages can be visited without loading.

Technologies: ReactJS | Firebase | ExpressJS | NodeJs | Tailwind CSS | DaisyUI | Vercel

EDUCATION

Bachelor of Science in Information and Communication Engineering
Bangladesh Army University of Engineering and Technology,
Qadirabad Cantonment, Natore, Bangladesh

December 2021- Present
